shabbaz.dev | github.com/shabbazanwar | linkedin.com/in/abdulazeem-salau-47b86a341

SUMMARY

Full-stack developer building and shipping production web applications end to end: React and Next.js interfaces in TypeScript and Tailwind CSS, Node.js APIs, and relational data in PostgreSQL via Prisma. Currently a Full-Stack Developer at Agunwami Enterprise, and freelance since September 2025, delivering e-commerce, legal, and fashion-brand projects independently from scoping through deployment, including Paystack payment integration. Trained through the GOMYCODE full-stack bootcamp and holds a BA in English from the University of Lagos. Based in Lagos, Nigeria.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, responsive design

Backend & Data: Node.js, Express, PostgreSQL, Prisma ORM, MongoDB, Supabase, RESTful API design, authentication & session handling

Practices & Tools: Git, GitHub, Vercel, Render, Agile delivery, debugging, performance optimisation

Languages: English (fluent), Yoruba, Nigerian Pidgin

EXPERIENCE

Full-Stack Developer | Agunwami Enterprise

Oct 2026 - Present

Freelance Full-Stack Developer | shabbaz.dev

Sep 2025 - Present

Began alongside undergraduate studies at the University of Lagos.

- Design and build full-stack web applications end to end for freelance clients, from initial requirements through production deployment, including SteezyWurld, Septagon Solicitors, Yew Couture, and Fabrication Legend.
- Develop responsive interfaces in React, Next.js, and TypeScript, styled with Tailwind CSS, across mobile, tablet, and desktop breakpoints.
- Design relational database schemas and write queries in PostgreSQL, using Prisma ORM for data modelling and migrations.
- Build and maintain RESTful APIs in Node.js, including authentication, session handling, and third-party integrations.
- Integrate Paystack payment processing, including webhook signature verification and idempotent handling to prevent duplicate transactions.
- Own client communication, scoping, timelines, and handover independently. Deploy and maintain applications on Vercel, Render, and Supabase.

Selected projects & education

PROJECTS

ShopSpire - E-Commerce Platform

React, JavaScript, Tailwind CSS, Supabase | shopspire.onrender.com

- Built a full-stack e-commerce application with product browsing and cart flows in React and Tailwind CSS, using Supabase for authentication, database, and image storage.

Bob Review Coach - AI Code Review Assistant

IBM Bob 2.0 Hackathon | github.com/shabbazanwar/Bob_project_hackathon

- Built solo for the IBM Bob 2.0 Hackathon: an AI-powered code review assistant that takes a code diff and returns structured findings, risk level, explanation, and suggested fix.

FinSync - Personal Finance Tracker

Next.js, TypeScript, PostgreSQL, Prisma ORM, Tailwind CSS | finsync-few1.onrender.com

- Designed and queried the relational schema for income and expense tracking through Prisma against PostgreSQL.

EDUCATION

BA (Hons) English | University of Lagos, Akoka

Oct 2023 - Aug 2026

- Final-year research project on the impact of social media on undergraduate written communication.

Full-Stack Software Development Bootcamp

GOMYCODE, Alagomeji, Lagos | Aug 2024 - Jan 2025

- JavaScript, Node.js, databases, RESTful APIs, and Git; built full-stack applications in teams using Agile practices.
